

Performance Evaluation of Large Language Models in Pharmacometrics Model Translation

Steve Choy¹ and Mahmoud Tareq Abdelwahab²

¹GSK, Collegeville, U.S.A; ²Boehringer-Ingelheim GmbH, Ingelheim, Germany

Digital poster and
Supplemental info

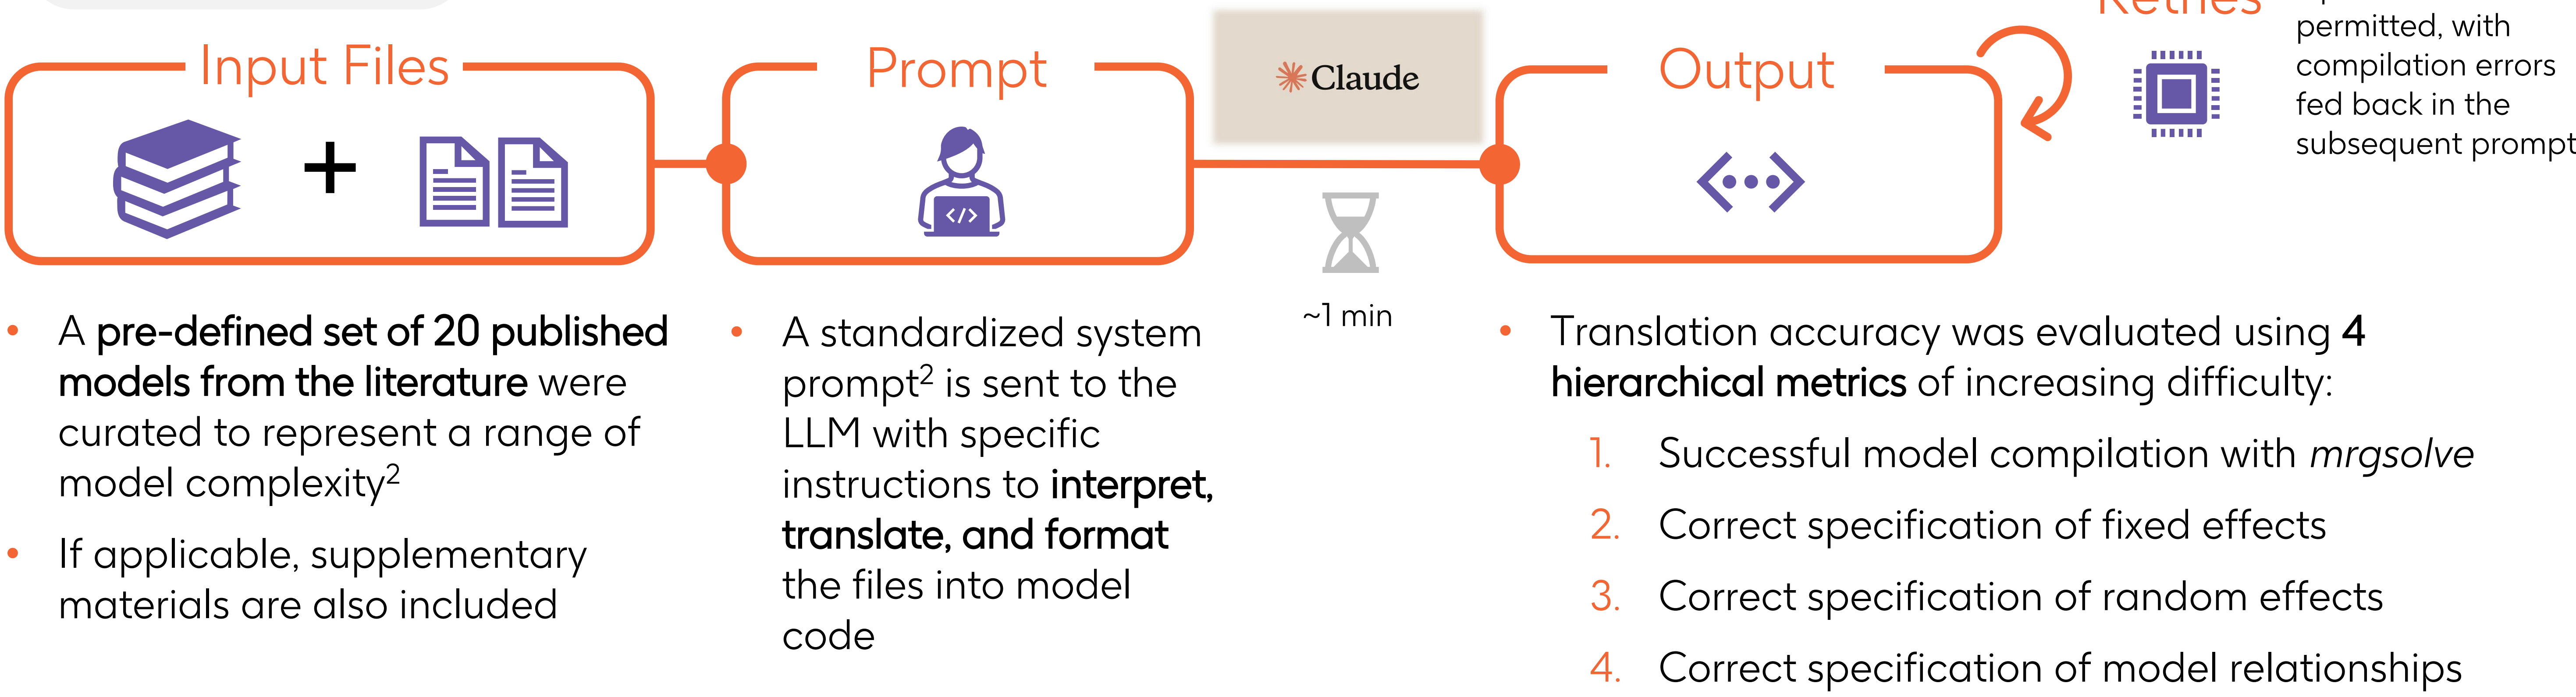

Aims

- Systematically evaluate the ability of large language models (LLMs) to accurately translate pharmacometrics literature into executable *mrgsolve* model code¹
- Characterize the types and frequency of translation errors across varying levels of model complexity

LLM Settings

Model name: **claude-sonnet-5**
Temperature: **1** (adaptive thinking)
Seed: **42**
Max retries: **2**
Effort: **High**
